

1. Write a Python program to create a dictionary of Hindi words with their English translations. Extend the program to allow the user to look up the English translation of a Hindi word.
2. Design a Python program that runs a quiz game similar to "Kaun Banega Crorepati (KBC)." Use a list of dictionaries to store each question along with four options, the correct answer, and a prize for each question. Display the total prize money won at the end.
3. Write a python program to translate a message into secret code language. Use the rules below to translate normal English into secret code language
 - a. Coding:
 - i. if the word contains at least 3 characters, remove the first letter and append it at the end now append three random characters at the starting and the end else: simply reverse the string
 - b. Decoding:
 - i. if the word contains less than 3 characters, reverse it else: remove 3 random characters from start and end. Now remove the last letter and append it to the beginning

Your program should ask whether you want to code or decode
4. Write a python program to create a rock-paper-scissors game in Python against the computer.
